SUMMARY

Full Stack Developer with 1+ year of experience building and deploying production web applications with TypeScript, React, Next.js, and Node.js, from responsive, SEO-optimized frontends to secure REST APIs, authentication, and PostgreSQL/MongoDB data models. Currently building an AI-powered EdTech platform at Tawasoul and delivering client websites as a freelancer.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, PHP, Python, SQL
Frontend: React, Next.js, Vue.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS, Bootstrap, Sass
Backend: Node.js, Express.js, NestJS, Laravel, FastAPI, Django REST Framework, Flask, RESTful APIs
Databases: PostgreSQL, MySQL, MongoDB, Supabase, Redis
Security: JWT authentication, role-based access control (RBAC), password hashing, input validation (Zod)
AI & Real-Time: LLM / AI API integration, NLP, prompt engineering, OCR, WebSockets (Laravel Echo, Pusher)
Tools & Practices: Git, GitHub, Cloudflare Workers, Vercel, Vite, CI/CD, Agile/Scrum, SOLID, clean architecture, SEO

PROFESSIONAL EXPERIENCE

Full Stack Developer (Part-Time) — Tawasoul **Jul 2026 – Present**
- Develop full-stack features for an AI-powered communication coaching platform where users practice professional scenarios such as interviews, meetings, and presentations with an AI coach.
- Built a timer feature to run timed practice sessions within the coaching experience.
- Implemented NLP-based detection of specific questions in conversations between users and the AI coach.

Freelance Full Stack Developer — Self-Employed **Jul 2026 – Present**
- Deliver end-to-end websites for businesses, from requirements gathering and UI design to deployment and ongoing support.
- Build with TypeScript, Next.js, React, and Tailwind CSS, and deploy on Cloudflare Workers, including custom domain setup.

Full Stack Developer — Digital Hub (UNRWA), South Lebanon **Jan 2026 – Jun 2026**
- Developed full-stack web applications with React, Next.js (SSR, SSG), and Node.js (Express, NestJS).
- Built RESTful APIs in Node.js and Python (FastAPI, Django REST Framework) following SOLID principles.
- Implemented secure authentication and authorization using JWT, password hashing, and role-based access control (RBAC).
- Modeled relational and NoSQL databases (PostgreSQL, MySQL, MongoDB) with normalized schemas.
- Integrated AI-powered features into web applications using pre-trained models and external AI APIs.

Full Stack Developer Intern — Octa Solutions, Saida **Oct 2025 – Jan 2026**
- Built responsive user interfaces with HTML, CSS, JavaScript, TypeScript, and React.
- Developed backend features in Laravel (MVC, routing, controllers) with CRUD operations on relational databases.
- Integrated frontends with REST APIs and collaborated with designers on testing and debugging.

PROJECTS

Doodlzz — E-Commerce Store (link)
Next.js · TypeScript · Supabase (PostgreSQL, Auth, Storage) · Tailwind CSS · Cloudflare Workers
- Built a bilingual (English/Arabic, RTL) storefront for a kids' toys and baby products retailer with user accounts, favorites, cart, search, and category and age-based browsing.
- Designed a PostgreSQL schema secured with row-level security and a server-side checkout function that validates carts and calculates prices, with cash-on-delivery and Whish payment options.
- Built an admin dashboard for products, categories, orders, and homepage media, with Supabase Storage uploads.

Gentle Elevators — Corporate Website (link)
Next.js · React · TypeScript · Tailwind CSS · Cloudflare Workers
- Developed a responsive, SEO-optimized website for an elevator company in Lebanon, with service and project showcase pages and WhatsApp, call, and quote-request contact flows, live on a custom domain.

The Digital Hub — Employability Platform (link)
React · TypeScript · Redux Toolkit · Node.js · Express · PostgreSQL · Redis
- Built a CMS-driven platform presenting training programs and cohorts, with cohort applications, participant and team directories, announcements, and recruiter visit requests.
- Developed a TypeScript Express REST API with PostgreSQL, Redis, JWT authentication, and Zod validation, plus an admin dashboard for content management.

EDUCATION

B.S. in Computer Science — Lebanese International University, Saida **Oct 2022 – Jun 2025**
Relevant coursework: Data Structures & Algorithms, Software Engineering, Networks, AI/ML, NLP, System Administration
Languages: Arabic (Native), English (Fluent)
